## Foreword

It is with immense contentment that I release the 2011/2012 Primary School Census Results. This is a milestone in the history of Education in Puntland State of Somalia. For the first time, the Ministry of Education with the support of UNICEF collated the data from schools using its own personnel who were given passable cascading training on data collection. This represents a turning point for the ownership of education initiatives, as the enumerators approach was replaced by the active involvement of the Ministry of Education personnel.

The establishment of a functional EMIS Unit at the Ministry is further a point towards the right direction in strengthening the education sector with evidence-based data which will inform sector planning.

The data collected for primary has already been utilized to feed into the Education Sector Strategic Plan 2012-2016 which is a precursor for ensuring more children be able to access and to fulfill their right to education.

I take this opportunity to thank UNICEF for their technical and financial support during the Census exercise and the European Union through the ICDSEA programme for their support in strengthening the institutional capacity of the Ministry of Education. We are also indeed very grateful to the Australian Government for the EMIS software donated free of charge to be used for the data analysis and to CfBT for their support to the EMIS development in Puntland.

I'm glad to see a growth in enrolment, number of teachers and of formal primary schools since 2006. This indicates the success of the work done by the Ministry of Education and the development partners in Puntland. Much more needs to be accomplished and the Ministry is confident to continue working closely with its development partners.

The Ministry hopes that this report will provide useful information to all education stakeholders and interested readers to promote an evidence-based planning and coordination and alignment of programmes.

ÀbdiFarah Saeèd

Minister of Education

## Executive Summary

This is the report of the 2011/2 Primary School Census that was conducted across 7 regions in Puntland in October 2011. It illustrates data from surveyed schools covering enrolment and teachers, disaggregated by gender and region, and where possible by grades. The report also gives an estimate of the Primary School Gross and Net Enrolment Rates (GER and NER), using the UNDP population projections estimates.

Due to lack of submissions of the census questionnaires to the MoE, information from 33 schools ( $6 \%$ of total school participating to the Census) is missing. Where appropriate for comparative purposes, data was adjusted to provide the reader with an appropriate estimation of the missing data.

Key findings from the census include:

- The number of pupils enrolled in primary school and Primary Alternative Education (PAE) centers increased to 107,907, a 43\% increment from 2006 data;
- The Gross Enrolment Rate was $41 \%$ (corrected for missing data) with a primary school age population (6-13) estimated at 227,018. Disaggregated by sex, this gives Puntland a GER of $46 \%$ for boys and $37 \%$ for girls;
- The Pupil Teacher Ratio in Formal Primary School was 21:1, with regional disparities;
( The teachers' cohort has continued to grow. When the census was conducted, 5,093 teachers were identified, including 920 females and 4,173 males. This corresponds to an increase of $133 \%$ from 2006. Teachers' distribution among rural and urban areas and imbalances between male and female teachers remains significant;
- The number of formal primary schools increased from 340 (2006 data) to 439. This represents an increment of $28 \%$;
- The Gender Parity Index (GPI) increased from 2006; this year the GPI was 0.77 , although gender gaps continued at all levels in the education sectors:
© 44\% of total Enrolments;
© $45 \%$ of Lower Primary Enrolment;
© 41\% of Upper Primary Enrolment;
© 18\% teachers;
© 13\% qualified teachers;
© 3\% certified teachers.
- $98 \%$ of teachers have some sort of qualification, while only $15 \%$ are certified. The data collected indicates that much more needs to be done to support quality education.

## Introduction

## The 2011/2012 Puntland Primary School Census

This is the final report of the Primary School Census in Puntland led for the first time by MoE. It was conducted by the MoE of Puntland and supported technically and financially by UNICEF.

Previous surveys were conducted by UNICEF and the MoE for the academic years 1997/8, 1998/9, 2000/1, 2001/2, 2002/3, 2003/4, $2004 / 5$ and $2005 / 6$. The objectives of the 2011/2 primary school census were a) to provide up to date information on key aspects of Puntland Primary Education system, b) establish baseline data against which progress can be measured and various plans of action can be developed by Education Partners operating in Puntland and c) create a reliable database through the EMIS Unit in the MoE.

The reader needs to be aware that in this report, trends and comparisons were done using the available UNICEF PES reports. However it is worth to note that the above mentioned reports covered only information on Bari, Karkar, Mudug and Nugal, excluding Ayn, Sool and Sanag regions. Therefore, charts and trends are based only on the information from Bari, Karkar, Mudug and Nugal.

The 2011/2012 primary school census is covering both the primary formal and Alternative Basic Education (ABE) systems along with Integrated Quranic Schools (IQS).

This Census Report is divided into two sections:
Section $\boldsymbol{A}$ covers the census as conducted in the formal primary schools, referred to as PS. Section A is concerned only with formal primary schools, excluding ABE and IQS. However, on calculation of the GER and NER, these pupils were included.
Section B presents the analysis of the ABE and IQS schools.

## Background

The EU-funded Integrated Capacity Development for Somali Education Administrations (ICDSEA) programme, which is managed by UNICEF and implemented through a collaborative partnership between the Puntland Ministry of Education, UNICEF, Africa Educational Trust (AET) and CfBT, aims to support capacity development of the MoE to reform the education sector and strengthen capacity to more effectively plan, manage and deliver formal and non-formal educational services. One of the key priorities of ICDSEA for 2011 was to support the MoE to establish a functional Education Management Information System (EMIS).

Effective management and coordination of education sector development programmes requires well-informed planners and decision makers, and regular monitoring of programmes using data and information. The MoE is committed to establishing a sector-wide EMIS that serves the needs of education sector managers at all levels, as well as those of development partners, school communities, public sector colleagues and higher education institutions.

In February-March 2011, an EMIS scoping study was conducted in which a detailed implementation plan was developed in consultation with MoE at all levels and Education Sector Committee (ESC) partners. An EMIS policy framework and development strategy were also produced and shared with key stakeholders. The EMIS Technical Working Group was established within the ESC which has been overseeing implementation of the EMIS work plan devised and endorsed during the scoping study.

Two important components of the EMIS implementation plan concerned: 1) the establishment of the system itself which involved procurement of hardware and software, configuring an existing EMIS platform to the Puntland context and training EMIS Unit staff within
the MoE in managing and maintaining the system; and 2) collecting the data required to populate the EMIS once established.

While the first component has been addressed through ICDSEA with the technical support of CfBT, UNICEF supported the MoE to conduct a primary school census across each region in order to collect data required to populate PLEMIS (Puntland Education Management Information System) and inform sector planning and policy reform.

## Methodology

This Report is a complete enumeration study of all Primary Schools (PS), Alternative Basic Education (ABE) and Integrated Quranic (IQS) schools. The aim was to collect information from all PS, ABE and IQS schools which were identified on the basis of previous surveys conducted by UNICEF and of a list submitted by the MoE, as well as through consultations with regional and education authorities. A final list comprising 439 primary schools was identified.

Data was collected from the schools by the District Education Officers (DEOs) who transmitted the questionnaires to the Regional Education Officers (REOs) who, after performing a quality check, submitted the questionnaires to the EMIS Unit in the MoE in Garowe.

Operational schools were defined as those that were currently in session or those that there were temporary closed (the latter were put dormant in PLEMIS), while those classified as non-operational had ceased operations for various reasons (drought, internal movement) at the time of the census. Nonexistent schools were those who did not exist and they were deleted from the EMIS list of schools in Puntland.

The 2011/2 Primary School Census was meant to be led by the Puntland MoE rather than sending enumerators to collect information for the Ministry. For this reason a training programme was designed to empower the MoE staff to conduct the Census including instruction on how to complete the census form. The training programme was designed to be delivered as cascaded training.

The Training of Trainers (ToT) Workshop took place in Garowe over four days, from 14 - 17 August, 2011. The ToT's participants were comprised of 70 Regional Education Officers (REOs), District Education Officers (DEOs) and Regional Education Supervisors to carry out the school census training for 467 identified Head Teachers (HT). A team of 4 'Super Trainers' from the Ministry, UNICEF and CfBT's ICDSEA program conducted the training.

The Trainer teams then travelled to the regions to hold large training programs in 5 regional capital centres, and deliver the training to 467 HTs.

## Survey Questionnaire

The census questionnaire was designed in English by an EMIS specialist and is in line with the EMIS software donated by AusAid to MoE and installed in the MoE EMIS Unit.

A review of the Census questionnaire was conducted in Garowe from early June 2011 by UNICEF Bossaso, CfBT and the MoE EMIS Technical Working Group. The form was revised and adapted to the Puntland context. A final English version was agreed on and translated into Somali. A detailed manual for instructing the HT was produced to guide the HT when filling the forms.

The Primary School Census Questionnaire is divided into 5 sections: 1) the school profile, 2) enrolment and classes, 3) teachers and teacher training, 4) school and classroom facilities and educational resources; and 5) school's financial management.

## Table 1, Primary School Census Survey Return Rate

| 2011/2 | Primary School Census Return Rate by Re- <br> gion | Survey Sent | Survey <br> Received |
| :--- | :---: | :---: | :---: |
| Region | \% Received |  |  |
|  | 24 |  |  |
| Ayn | 163 | 24 | $100 \%$ |
| Bari | 110 | 160 | $98 \%$ |
| Karkar | 74 | 106 | $96 \%$ |
| Mudug | 99 | 64 | $86 \%$ |
| Nugal | 57 | 91 | $92 \%$ |
| Sanag | 41 | 49 | $86 \%$ |
| Sool | $\mathbf{5 6 8}$ | $\mathbf{5 3 5}$ | $100 \%$ |
| Total |  |  | $\mathbf{9 4 \%}$ |

The HT filled the census questionnaires; however it is also worth noting that of the total number of schools, 33 governmental schools did not return the questionnaires to the MoE EMIS Unit, among these, a large number of schools mainly in Garowe town and some MoE schools in remote areas of Sanag region. This group represents only $6 \%$ of total number of primary schools (PS) in Puntland.

## Table 2, Primary School Census Missing Surveys by Region

| 2011/2 | Primary School Census Missing Surveys by Region |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Region | Survey <br> Missing | Private <br> Schools | MoE <br> Schools | Ngo <br> Schools | Community <br> Schools |
| Ayn | 0 | 0 | 0 | 0 | 0 |
| Bari | 3 | 0 | 3 | 0 | 0 |
| Karkar | 4 | 1 | 2 | 0 | 1 |
| Mudug | 10 | 0 | 9 | 0 | 1 |
| Nugal | 8 | 0 | 8 | 0 | 0 |
| Sanag | 8 | 0 | 8 | 0 | 0 |
| Sool | 0 | 0 | 0 | 0 | 0 |
| Total | $\mathbf{3 3}$ | $\mathbf{1}$ | $\mathbf{3 0}$ | $\mathbf{0}$ | $\mathbf{2}$ |

The School Census took place between the 26th and the 28th September 2011 and DEOs started collecting the census forms from the 28th September to the 10th October 2011 and submit the forms to the MoE regional offices. REOs were responsible to return the filled questionnaire to the MoE EMIS Unit in Garowe not later than the last week of October 2011. However, the latest census forms were submitted to the MoE in February 2012.

## Quality Control

To provide quality assurance to the data collected, several activities were carried out, which included:

DEOs travelled to each primary school within their catchment area to collect the questionnaires and acknowledge that the forms were filled correctly;

REOs reviewed questionnaires received from DEOs before submitting the forms to the MoE EMIS Unit in Garowe;
MoE Supervisors were dispatched to the regions for 6 days each during the census to support the Head Teacher in the compilation of the form;

- An independent audit, carried out by a local NGO with expertise in research, was carried out between December 2011 and January 2012. 72 schools, covering a sample of $15 \%$ of the total schools participating to the Census, were randomly selected and visited by a team of auditors and MoE staff. The audit revealed that $92 \%$ of the schools passed the audit exercise, hence validating the data collected;
- In August 2012, the EMIS Unit, with support from CfBT conducted a further quality control performing quality checks into PLEMIS.

## Data Entry and Analysis

Data entry and analysis was done in Garowe. A MS Access based software named Pineapple which was donated by AusAid, was further developed and customized to fit the Puntland context. A team of 4 data entry clerks, 1 EMIS Unit Coordinator and 2 MoE Education Officers was trained on the software usage, data entry and on how to make education analysis. This exercise was followed by a data cleaning process. Quality checks were performed on data entry by triangulation of data from UNICEF and INGOs and by the data entry clerks who double checked the data entered. Consistency checks were then run and where differences were noticed, the original questionnaire was retrieved and checked accordingly. If inconsistencies were found on the questionnaires, HTs were contacted and clarifications were made on the phone to correct such cases. This was done until all inconsistencies were eliminated. Data analysis was then conducted using Pineapple queries and MS Excel.

## Survey Limitations/Constraints

Two sections of the questionnaire were fully analyzed. However, due to poor results in Sections 3, 4 and 5 (missing/incorrect information and misunderstanding on how to fill the form) a decision was made not to release information on these particular sections of the census questionnaire. It is the hope of the MoE that the next school census will be able to provide wider information to stakeholders and to address these limitations.

## FINDINGS Section A: Primary Formal Education

## Numbers and Percentages of Primary Schools

Puntland has a total of 439 primary schools; however this report captures the information of only 411 schools. The size of the education system (number or schools, enrolment and teachers) varies significantly in the different regions and within districts in the same region. The largest concentration of schools was found in Bari (114) and inside the capital district, Bossaso (61), followed by Nugal and Karkar. The lowest number of schools was found in Ayn and Sool regions, although these districts are relatively small in terms of population size.

The highest concentration of teachers is, again in Bari with a total number of 1,090 teachers, followed by Nugal (812) and Mudug (643). The region that has the lowest number of teachers is Ayn. The teacher distribution is very unequal as the Pupil-to-Teacher Ratio for Sanag is $12: 1$ as compared to the one in Bari which is $24: 1$.

The gender gap does not vary considerably between districts: the proportion of girls accounted for about $43 \%$ across Puntland with Ayn reaching $37 \%$ and Sool $44 \%$. Highly populated regions like Bari and Nugal reach $42 \%$ and $45 \%$, respectively. However, there are still a great number of girls outside of the primary school system, with a Gender Parity Index (GPI) equal to 0.77 , with significant differences between regions.

Within the teaching force, the gender gap is even more pronounced. There are only 534 female teachers, accounting for only $13 \%$ of all teachers in Puntland. Differences are evident between regions like Bari with $12 \%$ female teachers, and Karkar and Nugal that have $18 \%$.

## Table 3, Number of Schools, Learners, Teachers and Percentage of Female Learners and Teachers by Region and District

| 2011/2 |  | Schools | Pupils |  | Teachers |  |
| :--- | :--- | :---: | :---: | :---: | :---: | :---: |

There are 161 schools in urban areas, compared to 250 in rural areas, representing $61 \%$ of total primary schools in Puntland; rural schools in Ayn, Sool and Sanag represent $70 \%, 85 \%$ and $70 \%$ of total schools. The largest numbers of rural schools are in Bari (51) and Nugal (51). Urban schools are mainly in Bari (57), Mudug (29) and Karkar (27) with Bossaso district counting 56 schools, Garowe (22) and Qardo (23).

## Enrolment

## Overall Enrolment

The overall enrolment for Puntland stands at 91.451, which corresponds to an increase of $42 \%$ from 2006 data when the UNICEF PES recorded a total of 64,545 learners enrolled from grade 1 to grade 8 .

The growth trend continues to rise since 2003, as shown in Figure 1. However no information was available for the year 2007, 2008, 2009 and 2010, hence it was not possible to analyze the yearly percentage growth as no adjustment was made.

## Figure 1, Enrolment Trends

## Enrolment Distribution

Most pupils are enrolled in the main regions of Bari (29\%) and Nugal ( $22 \%$ ). $4 \%$ of the school population is in Ayn.

Although $61 \%$ of formal primary schools in Puntland are in rural settings, only 38,139 children, representing $42 \%$ of total students, are enrolled in rural schools. The majority of students (58\%) are concentrated in the 161 schools in urban areas demonstrating that schools in urban areas play a major role in education service provision.

## Table 5, Number and Percentage of Total Enrolment by Region

| Total | $\mathbf{3 8 , 1 3 9}$ | $\mathbf{4 2 \%}$ | $\mathbf{5 3 , 3 1 2}$ | $\mathbf{5 8 \%}$ |

## Enrolment in Lower Primary versus in Upper Primary by Region

Seventy-one per cent of total primary school children (63.454) were enrolled in Lower Primary, while Upper Primary accounted for only 27,993 (29\%). Compared to 2006 PES data, a difference of $10 \%$ was noted, with a Lower Primary enrolment that accounted for $81 \%$ and an Upper Primary enrolment which reached $19 \%$. This demonstrates that more children are continuing their studies in the upper streams; as compared to 2006 , upper primary enrolment rose of $125 \%$.

All regions in Puntland had high percentage of primary school children in lower primary; Sool region had the highest percentage of primary school children in Lower Primary and the lowest percentage in Upper Primary, indicating the lowest survival rate in Puntland.

Mudug only showed a better survival rate (see further discussion on survival rates p. 26)
The statistics suggest that there is a very high dropout rate between Lower and Upper Primary which could be due to inadequate spaces in Upper Primary or lack of funds to pay school fees. It is alarming to acknowledge that only 3 out of 10 children continue their education in upper primary classes.

## Table 7, Percentage of Learners in Lower and Upper Primary

| Total | $\mathbf{6 3 , 4 5 4}$ | $\mathbf{1 0 0 \%}$ | $\mathbf{2 7 , 9 9 7}$ | $\mathbf{1 0 0 \%}$ |

## Enrolment by Grade and Gender

Boys constituted $57 \%$ of the total primary school learners enrolled in Puntland. Only 39,708 girls were enrolled or $43 \%$ of the total. However, it is remarkable to note that there was an increase of 54\% (13,952 more girls) in girls' enrollment from 2006 where the percentage of girls stood at $40 \%$.
The lowest percentage of girls' enrollment was witnessed in Upper Primary and the proportion of girls' declines gradually from grade 1 to grade 8 , indicating high dropout rates. Between grade 5 and grade 8 there is an average yearly dropout of $22 \%$ for girls between two consecutive grades. The statistics for boys are similar as they dropout from grade 5 to grade 8 at an average rate of $17 \%$ between two consecutive grades.

## Table 9, Number and Percentage of Enrolment by Grade and Gender

Figure 2, Enrolment by Grade and Gender

## Figure 3, Enrolment trends by Gender, 2003-2011

Enrolment trends by Gender, 2003-2011

## Gross Intake and Survival Rates

The Gross Intake rate (total numbers of pupils enrolled in Grade 1) stood at 39,708 ( 11,465 girls and 16,532 boys), which corresponds to an increase of $20 \%$ from 2006.

The growth rate was positive if compared to 2006 data, with high percentage increases in Grade 5, Grade 6 and Grade 7 where enrolment increased from 2006 of $129 \%$, $199 \%$ and $132 \%$ respectively which demonstrates that more children are attending upper stream classes.

Due to unavailability of data from 2010, it was not possible to calculate the survival rates between two consecutive years. However the statistics allowed the estimation (without taking into account the repetition rate) of the survival rates of those students who were enrolled in 2004 in Grade 1 and survived up to Grade 8 in 2011.

The survival rate is equal to $36 \%$; in addition $43 \%$ of students enrolled in Grade 1 in 2006 are now in Grade 6 in 2011. For the latter calculation, when data was disaggregated by sex, $42 \%$ girls and $43 \%$ boys survived to grade 6 .

## Figure 4, Enrolment variation by grade, 2006 and 2011

## Gross Enrolment Rate (GER) and Net Enrolment Rate (NER)

The GER, as per the UNESCO definition, is the total enrolment within a country in a specific level of education, regardless of age, expressed as a percentage of the population in the official age group corresponding to this level of education.

The GER was calculated using enrolment data from the 2011-2012 Primary School Census and UNDP population projection estimates for 2011. The population estimates for the school age children 6-13 years stands at 227,018 and this is the age group that should be normally attending grades $1-8$ of primary education. To get a compre-
hensive picture of the Primary Education System in Puntland, those children enrolled in IQS and ABE Schools were included and data was adjusted by including the enrolment estimation of the 28 missing schools.

The GER for Puntland stands at $41 \%$ for both boys and girls. However, the GER for boys is $46 \%$, while that of girls is only $37 \%$, confirming that fewer girls are going to school.

## Table 13, Gross Enrolment Rate (GER) by Gender

| 2011/2 | UNDP <br> Population <br> Projections | Population <br> age 6-13 | Number of <br> Pupils in <br> Grade 1-8 | GER |
| :--- | :--- | :--- | :---: | :---: |
| Girls | $1,106,490$ | 113,146 | 41,532 | $37 \%$ |
| Boys | $1,143,310$ | 113,872 | 52,531 | $46 \%$ |
| Total | $\mathbf{2 , 2 4 9 , 8 0 0}$ | $\mathbf{2 2 7 , 0 1 8}$ | $\mathbf{9 4 , 0 6 3}$ | $\mathbf{4 1 \%}$ |

The 2011 GER has grown from the 2006/7 figure. It is of paramount importance to emphasize, once again, that the current GER uses the UNDP population projection estimates ( $3 \%$ annual growth rate from 2005 data) as denominator. However, in 2013 UNDP, UNICEF and other partners are planning to conduct a Population Census, which will give the MoE and UNICEF the possibility to calculate the GER on actual population figures rather than on projections.

Overall, more investments need to be channeled towards Education together with more emphasis on coordination of initiatives for an effective and efficient growth of the whole education sector.

Figure 5, Gross Enrolment Rate by Gender

Gross Enrolment Rate by Gender

Figure 6, Gross Enrolment Rate trends, 1997-2011

To show the extent of coverage in a given level of education of children belonging to the official age group corresponding to the given level of education, the NER needs to be calculated. As defined by UNESCO, the NER is the enrolment of the official age group for a given level of education, expressed as a percentage of the corresponding population.

The NER was calculated using enrolment data from the 2011-2012 Primary School Census and UNDP population estimates for 2011. The number of school age children 6-13 enrolled in Grade 1-8 was 83,276 . To get a comprehensive picture of the Primary Education System in Puntland, those children enrolled in IQS and ABE Schools were included. No adjustment was made.

In Puntland, the NER stands at the low figure of $37 \%$. When comparing the NER for boys and girls, the latter was only $33 \%$.

## Table 14, Net Enrolment Rate (NER) by Gender

| $\mathbf{2 0 1 1 / 2}$ | UNDP <br> Population <br> Projections | Population <br> age 6-13 | Number of school <br> age children 6 -13 <br> enrolled in Grade <br> $\mathbf{1 - 8}$ | NER |

Figure 7, Net Enrolment Rate by Gender

## Net Enrolment Rate (NER) by Gender

## Teachers

## Distribution of Teachers

Puntland has 4,173 teachers, including 3,639 males and 534 females. The teacher cohort recorded in 2006 was 2,187 (PES 2006/7 data), which shows that there was a growth rate around $91 \%$ for both female and male teachers.

The rural/urban analysis showed a balanced distribution: 48\% of total teachers are in rural areas, while $52 \%$ in urban settings. Only in Sool, Ayn and Sanag regions the total number of teachers in the rural setting (299, 135 and 317 respectively) exceeded significantly the numbers in urban areas.

## Table 15, Urban/Rural Distribution of Teachers by Region

| $\mathbf{2 0 1 1 / 2}$ | Urban/Rural Distribution of Teachers by Region |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |

| Total | $\mathbf{2 , 0 2 3}$ | $\mathbf{4 8 \%}$ | $\mathbf{2 , 1 5 0}$ | $\mathbf{5 2 \%}$ | $\mathbf{4 , 1 7 3}$ |

## Distribution of Teachers by Gender

Generally, the number of male teachers was seven times the number of female teachers. Overall, $87 \%$ of teachers in Puntland were males and this proportion is getting worse as compared to what was recorded in $2006 / 7$ when the male teachers represented $82 \%$ of the total number of teachers.

The largest population of female teachers was in Nugal (143) and Bari (128), while very few female teachers were found in Sool (19) and Ayn (26).

## Table 16, Distribution of Teachers by Gender and Region

| $\mathbf{2 0 1 1 / 2}$ | Distribution of Teachers by Gender and Region |  |  |  |  |

## Distribution of Teachers by Qualification

In regards to teachers' qualification, a qualified teacher was defined as someone who has finished the basic required academic training to become a teacher, but he or she has not necessarily undertaken any specific teacher training. A certified teacher is, instead, a qualified teacher who has also completed the minimum required number of years of teacher training. At last, an unqualified teacher is someone that is neither qualified nor certified.

The total number of qualified teachers was 4,115 , including 530 females and 3,585 males. Females represented only $13 \%$ of the qualified teachers' cohort. In addition, only 636 teachers ( $18 \%$ females) completed at least two years of teacher training which qualify them as certified teachers. 58 teachers were recorded as unqualified, representing $1 \%$ of the total number of teachers in Puntland.

## Table 18, Qualification of Teachers by Region

| 2011/2 | Qualification of Teaches by Region |  |  |  |
| :--- | :---: | :---: | :---: | :---: |
| Region | Qualified | Certified | Unquali- <br> fied | Total |
| Ayn | 201 | 5 | 2 | 203 |
| Bari | 1,077 | 178 | 13 | 1,090 |
| Karkar | 583 | 43 | 0 | 583 |
| Mudug | 628 | 27 | 15 | 643 |
| Nugal | 812 | 183 | 0 | 812 |
| Sanag | 482 | 126 | 24 | 506 |
| Sool | 332 | 74 | 4 | 336 |
| Total | $\mathbf{4 , 1 1 5}$ | $\mathbf{6 3 6}$ | $\mathbf{5 8}$ | $\mathbf{4 , 1 7 3}$ |

## Qualified Teachers

Out of 4,115 qualified teachers ( 530 females), $8 \%$ have a Diploma (7\% females), $75 \%$ a Secondary School Certificate (13\% females) and only $5 \%$ a Bachelor Degree ( $4 \%$ females).

In details, 336 teachers reported to have a diploma and 3,096 a secondary school certificate as their highest qualification. When the analysis was done at the regional level, out of these 336 diploma holder teachers, Bari, Mudug and Nugal accounted for $78 \%$ of it, showing that distribution is extremely polarized in these three regions.

The distribution of teachers holding a secondary school certificate is spread more evenly across the 7 regions, although Bari and Nugal account for $23 \%$ and $21 \%$ respectively of this category. There were 4 Masters' degree accounted for in Bari (2) and Karkar (2).

The analysis also showed that $64 \%$ of those qualified teachers with a Primary School Certificate as their highest qualification were based in the rural schools while instead $50 \%$ of teachers with secondary education taught in urban schools.

## Table 19, Number and Percentage of Teachers' Qualifications by Gender and Region

| 2011/2 | Qualification of Teachers by Gender and Region |  |  |  |  |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Region | Qualified |  |  | Certified |  |  | Unqualified |  |  |
|  | \% | $\frac{\frac{\square}{0}}{\sum_{2}^{5}}$ | $\stackrel{o}{0}^{\circ}$ | \% | $\frac{\frac{0}{6}}{\sum_{z}^{5}}$ | $\begin{aligned} & \circ \\ & i= \\ & i \end{aligned}$ | \% | $\frac{\square}{\text { ® }}$ | $\stackrel{\circ}{i}$ |
| Ayn | 25 | 176 | 12\% | 0 | 5 | 0\% | 1 | 1 | 50\% |
| Bari | 127 | 950 | 12\% | 22 | 156 | 12\% | 1 | 12 | 8\% |
| Karkar | 103 | 480 | 18\% | 4 | 39 | 9\% | 0 | 0 | 0\% |
| Mudug | 56 | 572 | 9\% | 6 | 21 | 22\% | 0 | 15 | 0\% |
| Nugal | 143 | 669 | 18\% | 57 | 126 | 31\% | 0 | 0 | 0\% |
| Sanag | 57 | 425 | 12\% | 20 | 106 | 16\% | 2 | 22 | 8\% |
| Sool | 19 | 313 | 6\% | 3 | 71 | 4\% | 0 | 4 | 0\% |
| Total | 530 | 3,585 | 13\% | 112 | 524 | 18\% | 4 | 54 | 7\% |

## Certified Teachers

Certified teachers are only 636 or $15 \%$ of total teachers in Puntland. The proportion of certified teachers with a teaching diploma as their highest education qualification was $82 \%$, while those with a teaching certificate were only $9 \%$. Only 52 teachers held a Bachelor Degree in Education ( $6 \%$ females).
The survey recorded only a total of 112 female certified teachers $(18 \%)$ and an urban/rural analysis showed that $63 \%$ of them were
teaching in urban settings. $46 \%$ of certified male teachers (242) were recorded teaching in rural schools.

## Table 20, Distribution of Teachers by Highest Education Qualification by Region and Gender

## Pupil-to-teacher ratio (PTR)

The PTR in Puntland stands at a good ratio 21:1, with the highest PTR in Mudug where there was an average of 26 learners per 1 teacher, and the lowest in Karkar with 17 learners per 1 teacher. High populated regions such as Bari and Nugal had PTRs of 24:1 and 25:1 respectively.

It is worth to note the PTR has significantly improved since 2006, when the PES recorded an overall PTR of 30:1.

Table 22, Pupils Teacher Ratio (PTR) by Region and District

## FINDINGS Section B: Primary Alternative Education

## ABE (Alternative Basic Education) and IQS (Integrated Quranic

 Schools) schoolsAlong with formal primary schools, primary school-aged children were found to be learning in non-formal education settings which in this report we refer to as Primary Alternative Education (PAE) centres. PAE centres are supposed to support the provision of basic education to all primary school-aged children in Puntland. This report analyzed ABE (Alternative Basic Education) and IQS (Integrated Quranic Schools) schools.

ABE schools are mainly supported by two international NGOs (INGOs), the Norwegian Refugee Council (NRC) and Save the Children while IQSs are mainly community based. IQS are traditional Quranic Education schools were Koranic Education is taught together with basic literacy and numeracy to prepare children.

## Distribution and size of Primary Alternative Education

 Centres (PAE)The 2011 Primary School Census recorded only 69 PAE centres ( 58 ABE and 11 IQS). The 2006/7 UNICEF PES survey accounted for 303 PAE centers, hence the statistics indicate a considerable reduction of Alternative Education for the same reasons addressed under the heading 'Overall Enrolment'.

In the various regions of Puntland, the number and size of the ABE centres varies considerably. The largest number of centres was found in Bari (24) and Nugal (12) regions and the distribution of ABE indicates that they are largely limited to urban settings.

## Table 23, Number of ABE Centres, Learners and Teachers by Gender and Region

| 2011 |  | Schools | Learners |  | Teachers |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |

|  | Total Bari | 22 | 4,595 | 43\% | 195 | 7\% |
| Karkar | Rako | 3 | 183 | 40\% | 9 | 0\% |
|  | Qardho | 30 | 2,274 | 47\% | 121 | 6\% |
|  | Hafuun | 3 | 192 | 41\% | 7 | 43\% |
|  | Total Karkar | 36 | 2,649 | 46\% | 137 | 7\% |
| Mudug | Galkacyo | 1 | 592 | 45\% | 12 | 0\% |
|  | Total Mudug | 1 | 592 | 45\% | 12 | 0\% |
| Nugal | Garowe | 5 | 509 | 44\% | 24 | 25\% |
|  | Total Nugal | 5 | 509 | 44\% | 24 | 25\% |
| Sanag | Baran | 4 | 386 | 44\% | 19 | 0\% |
|  | Total Sanag | 4 | 386 | 44\% | 9 | 0\% |
| Sool | Hudun | 1 | 21 | 38\% | 2 | 0\% |
|  | Total Sool | 1 | 21 | 38\% | 2 | 0\% |
|  | Total Puntland | 73 | 9,252 | 44\% | 426 | 8\% |

The ratio of students in the Primary Formal Education sector to students in the PAE Sector was 5:1, in line with the ration of 2006. The PAE Sector still plays a vital role in the Puntland education service provision.

## PAE Enrolment

## Overall Enrolment

The enrolment of pupils in ABE and IQS is 16,456 - an increment of 5,355 PAE learners recorded in 2006/7 UNICEF PES. Girls represent $42 \%$ of this learners' cohort, equally distributed across the 7 Puntland regions.

The largest number of PAE centers was found in Bari and Karkar. These two regions combined represented $70 \%$ of the total PAE enrolment.

## Table 25, Number and Percentage of Total PAE Enrolment by Region

| $\mathbf{2 0 1 1 / 2}$ | Number and Percentage of Total Enrolment |  |
| :--- | :---: | :---: |
| Region | Enrolment | \% of Total Enrolment |
|  |  |  |
| Ayn | 500 | $3 \%$ |
| Bari | 8,639 | $52 \%$ |
| Karkar | 2,972 | $18 \%$ |
| Mudug | 1,494 | $9 \%$ |
| Nugal | 2,207 | $13 \%$ |
| Sanag | 623 | $4 \%$ |
| Sool | 21 | $0.13 \%$ |
| Total | $\mathbf{1 6 , 4 5 6}$ | $\mathbf{1 0 0 \%}$ |

## Enrolment Distribution

The majority of students enrolled in IQS and ABE schools were boys, who accounted for $58 \%$ of the total number of students, while girls were only 7,567. The Gender Parity Index (GPI) in the PAE schools is 0.85 showing that girls attend more PAE centers rather the primary formal education where the GPI stood at 0.77 .

## Table 26, IQS and ABE Enrolment by Gender and Region

| $\mathbf{2 0 1 1 / 2}$ | IQS and ABE Enrolment by Gender and Region |  |  |  |
| :--- | :---: | :---: | :---: | :---: |
| Region | Boys | Girls | \% Girls | Total |
|  |  |  |  |  |
| Ayn | 292 | 208 | $42 \%$ | 500 |
| Bari | 4,653 | 3,986 | $46 \%$ | 8,639 |
| Karkar | 1,622 | 1,350 | $45 \%$ | 2,972 |
| Mudug | 782 | 712 | $48 \%$ | 1,494 |
| Nugal | 1,188 | 1,019 | $46 \%$ | 2,207 |
| Sanag | 339 | 284 | $46 \%$ | 623 |
| Sool | 13 | 8 | $38 \%$ | 21 |
| Total | $\mathbf{8 , 8 8 9}$ | $\mathbf{7 , 5 6 7}$ | $\mathbf{4 2 \%}$ | $\mathbf{1 6 , 4 5 6}$ |

Only $24 \%$ of children were recorded as attending schools in rural areas, while $76 \%$ attended classes in urban settings. Girls' rural and urban enrolment followed this path: girls were mostly recorded in the urban PAE centres.

## Table 27, IQS and ABE Rural and Urban Enrolment by Region

| 2011/2 | Rural and Urban Enrolment |  |  |  |
| :--- | :---: | :---: | :---: | :---: |

| Total | $\mathbf{3 , 9 3 6}$ | $\mathbf{2 4 \%}$ | $\mathbf{1 2 , 5 2 0}$ | $\mathbf{7 6 \%}$ |

## Enrolment by Grade and Gender

Boys constituted 54\% of the total PAE centres' learners enrolled in Puntland. Only 7,567 girls were enrolled or $46 \%$ of the total.

The lowest percentage of girls' enrollment was witnessed in Upper Primary and the proportion of girls' declines gradually from grade 1 to grade 8 , indicating high dropout rates. $76 \%$ of PAE learners were found in Grade 1 and 2 and Lower Primary accounted for $92 \%$ of total learners.

## Table 28, Girls' Urban and Rural PAE Enrolment by Region

## PAE Teachers

## Distribution of $A B E$ and IQS Teachers

This year's census recorded 920 PAE teachers, including 123 females and 797 males. Female teachers were only $13 \%$ of the teaching cohort. This percentage is in line with that of the formal sector, where the proportion of female teachers also stood at $13 \%$.
The largest population of teachers was found in Bari, Karkar and Nugal and the lowest in Sool, Sanag and Ayn, although these three regions have only 11 PAE centres. Nugal had the largest number of female teachers (31), while Sool and Sanag 0.

Table 30, Distribution of Teachers in ABE and IQS by Gender and Region

| $\mathbf{2 0 1 1 / 2}$ | Distribution of Teachers by Gender and Region |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |

## Table 31, Urban/Rural Distribution of PAE Teachers by Region

| 2011/2 | Urban/Rural Distribution of Teachers by Region |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Region | Rural | \% | Urban | \% | Total |
| Ayn | 26 | $70 \%$ | 11 | $30 \%$ | 37 |
| Bari | 54 | $12 \%$ | 409 | $88 \%$ | 463 |
| Karkar | 32 | $21 \%$ | 118 | $79 \%$ | 150 |
| Mudug | 27 | $29 \%$ | 65 | $71 \%$ | 92 |
| Nugal | 56 | $38 \%$ | 92 | $62 \%$ | 148 |
| Sanag | 3 | $11 \%$ | 25 | $89 \%$ | 28 |
| Sool | 2 | $100 \%$ | 0 | $0 \%$ | 2 |
| Total | $\mathbf{2 0 0}$ | $\mathbf{2 2 \%}$ | $\mathbf{7 2 0}$ | $\mathbf{7 8 \%}$ | $\mathbf{9 2 0}$ |

An Urban/Rural analysis indicated that almost 78\% of teachers are teaching in urban schools while only 200 teachers are involved in teaching the 3,936 learners from the rural areas. The urban/rural analysis for female teachers is in line with the overall percentage of teachers, as there were 25 female teachers in rural schools, representing $20 \%$ of total female teachers.

The statistics revealed an uneven distribution of teachers across the rural and urban areas of Puntland which demands for equity improvements by, for instance, redistributing the current teaching force.

## Table 32, Urban/Rural Distribution of PAE Female Teachers by Region

| 2011/2 | Distribution of Female Teachers in rural/urban settings |  |  |  |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |

## Distribution of Teachers by Qualification

In regards to teachers' qualification, the total number of qualified teacher was 900 , including 122 females and 778 males. Females represented only $14 \%$ of the qualified teachers' cohort. In addition, only 108 teachers were certified ( $25 \%$ females).

There were only 20 unqualified teachers in ABE and IQS centres, including 10 males and 1 female ( $5 \%$ ) which represented $2 \%$ of total teachers in the PAE Sector.

However, the certified teachers are only $12 \%$ of the total number of teachers in Puntland.

| Total | 3 | 67\% | 1 | 0\% | 9 | 0\% | 93 | 27\% |

## Qualified Teachers

Out of 900 qualified teachers ( 122 females), $8 \%$ have a Diploma ( $9 \%$ females), $74 \%$ a Secondary School Certificate (13\% females) and only 5\% a Bachelor Degree ( $12 \%$ females).

In details, 69 teachers reported to have a diploma and 668 a secondary school certificate as their highest qualification. When the analysis was done at the regional level, out of these 69 diploma holder teachers, Bari and Karkar accounted for $84 \%$ of it, showing that distribution is extremely polarized in these two regions. The distribution of
teachers holding a secondary school certificate is spread more evenly across the 7 regions, although Bari accounted for $50 \%$ of this category.

The analysis also showed that $78 \%$ of those qualified teachers with a Primary School Certificate (102) as their highest qualification were based in the urban schools while instead, $80 \%$ of teachers with secondary education, taught in urban schools.

## Certified Teachers

The proportion of certified teachers with a teaching diploma as their highest education qualification was $88 \%$, while those with a teaching certificate were only $8 \%$. Only 3 teachers held a Bachelor Degree in Education, 2 of them being females.

The survey recorded only a total of 27 female certified teachers (25\%) and an urban/rural analysis showed that $74 \%$ of them were teaching in urban settings. Only $27 \%$ of certified male teachers (79) were recorded teaching in rural schools.

## Pupils per teacher ratio (PTR)

The PTR for primary alternative education in Puntland stands at 18:1, with the highest PTR in Sanag (22:1) and Karkar (20:1).
Table 37, PAE Pupils Teacher Ratio (PTR) by Region and District
